

Top Men's Recruits for 2008

Saturday, 31 May 2008

Barefootballer's college soccer reporter has scoured the country and chosen who he believes are the top men's recruits for the upcoming 2008 college soccer season.

If I've left players out, it's because I haven't seen them play. I'm sure there are many talented incoming freshmen in this country but I will not put them on my list based on their destination or accolades. Regardless, these players are very talented and you should try to see them play at some point this year.
